## Largest patient safety confex in the region

[patientsafety-me.com](https://patientsafety-me.com)

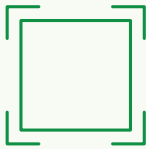

# Overview

Patient Safety is the leading business platform to connect with healthcare professionals who are keen on improving patient care. The event is the only congress within the Middle East region that integrates multiple disciplines relating to patient safety, CSSD, and infection control.

Now embarking on its 18th edition and being back live in-person, Patient Safety is the must-attend healthcare conference for medical professionals.

key speakers

# Conference overview

Connecting you to the future of patient care

## Infection Under Control

Led by industry experts, the conference aims at establishing the importance of right standard of care with the infusion of AI led surveillance protocols to prevent the spread of infections.

## Safety is the priority, Quality is the standard

Constant improvements in creating a patient safe environment are imperative. The conference is curated to address the elimination of human error and exploring the digital world to create a safe, smooth, and swift journey for the patients.

## A step forward in the world of CSSD

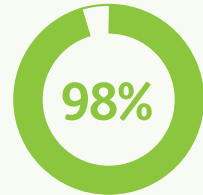

The CSSD conference is designed to shed light on the monumental function of the CSSD, the associated complexities and developments in paving the way forward.
